# Making or receiving a call during a power failure (Simplified power failure voice call)

In the event of a power failure, you can make or receive calls from the main unit or the portable handset by using the battery in the main unit.

- You cannot use other functions such as fax, copy or answering device.
- When you first purchase this product, you can make or receive calls only from the main unit. If you wish to make or receive calls from the portable handset as well, it is necessary to make settings (see below).
- To make provision for a power failure, be sure to insert the battery in the main unit. (See “Inserting the battery into the main unit” on page 4.)  
When you insert the battery, it will start to be charged, enabling it to function as a power source in the event of a power failure.
- When you carry out a simplified power failure voice call operation, the display on the main unit will light up for 30 seconds.
- During a power failure, the display and lamps will go out. If the display does not light up when you pick up the handset, it means that the battery has completely run down. (Unless you carry out an pushbutton operation, the display will go out after about 30 seconds.)

## Setting to enable you to make a simplified power failure voice call from the portable handset

- Carry out the following operation from the main unit. (This operation cannot be performed during a power failure.)

1 Press (Function/Set).

2 Press .

3 Press (Search button) to select “親機・子機” (Main unit/Portable handset).

停電時動作  
親機のみ  
親機・子機

4 Press (Function/Set).

5 Press (Stop).

## Making a voice call on the main unit

- During a call, when the battery almost completely runs down, a beep will be heard every four seconds from the receiver of the handset.

1 Lift the handset.

2 ■ **Making a voice call by entering a telephone number**  
When “電話番号?” appears on the display, dial the number.

■ **Making a voice call by redialing the last party that you called**

Press (Redial).

■ **Making a voice call using the phonebook**

① Carry out steps 1 to 3 of “Making a voice call using the phonebook” on page 12.

② Press (Make a call).

■ **Making a voice call using the speed dialer**

① Press (Speed dialer).

② Press (Search button) repeatedly to select the desired name.

③ Press (Make a call).

## Making a voice call on the portable handset

- If a power failure occurs during a voice call or when the line is on hold, the connection will be broken.

1 Lift the portable handset from the charger, then press (Talk).

2 ■ **Making a voice call by entering a telephone number**  
Dial when you hear a steady tone.

■ **Making a voice call using the phonebook**  
See “Making a voice call using the phonebook” on page 14.

■ **Making a voice call using the one-touch dialer**  
See “Making a voice call using the one-touch dialer” on page 15.

## ■ Rough guide to the usable period (when the ambient temperature is 20 °C) after the completion of charging (approx. 10 hours)

Setting the operation to take place in the event of a power failure	Continuous voice call time	Standby period*
“親機のみ”(Main unit)	for about 1 hour	for about 24 hours
“親機・子機”(Main unit/Portable handset)	for about 1 hour	for about 5 hours

\* The standby period will decrease when the telephone rings or during a voice call.

- After a power failure has occurred, the usable period will be reduced until the battery is fully recharged again.
- When the battery inside the main unit runs down, you cannot make a voice call from the portable handset even if there is a charge remaining in the battery inside the portable handset. Also, if the charge in the battery inside the portable handset is low, the above period will be reduced further.
